irt Unit: 1617

## DETAILED ACTION

Receipt of applicants' amendments and remarks submitted September 27, 2004 is acknowledged.

## Claims Rejections 35 U.S.C. 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Glaims 15-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tice at al (US 4,389,330) for reasons set forth in the prior office actions (See, office action mailed October 4,2001, and the comment made in office action mailed July 23, 2002).
- 3. Claims 15-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cleland et al. (WO 95/11010) for reasons set forth in the prior office action mailed July 23, 2002.

## Response to the Arguments

Applicants' amendments and remarks submitted September 27, 2004 have been fully considered. The amendments are persuasive to remove the rejections of claims 7 and 11 set forth in the prior office action, but are not persuasive with respect to the rejections set forth above.

It is noted that the rejections over Tice et al. had been maintained as stated in the office action mailed July 23, 2002. Applicants made no further remarks to those rejections.

Applicants assert that the instant application is a CIP of Serial No. 867,301 filed April 10, 1992. Therefore, the claimed invention should entitled the priority and Cleland et al. which published in 1995 is not a proper prior art. The arguments are found not persuasive. Particularly,

Application/Control Number: 09/586,747

Aft Unit: 1617

Serial No. 867,301 does not support the subject matter herein claimed. Specifically, application No. 867,301, which matured into US patent 5,417,986, does not provide written description for "a conformationally native subunit of chronic intracellular pathogen, is exposed to the host immune system on the surface of free pathogen and/or pathogen-infected cells." '301 merely provides support for "encapsulated protein subunit," but fails to provide guidance, direction or working examples for the particular subgenus herein claimed. Therefore, the claimed invention is not entitled the priority of serial No. 867,301.

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy/asset/fonth-in/37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shengjun Wang whose telephone number is (571) 272-0632. The examiner can normally be reached on Monday to Friday from 7:00 am to 3:30 pm.

Application/Control Number: 09/586,747

If aftempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan, can be reached on (571) 272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, sontage the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
